

***Lemna perpusilla* Torrey,
L. turionifera Landolt, and
L. valdiviana Philippi**

Current Status

TU, TU, PX

Proposed Status (click for definitions)

W

Proposed by: Steve Grund

WPC/PNHP

Habitat

Mesotrophic to eutrophic, quiet waters in temperate regions with relatively mild winters (Landolt in FNA)

Estimated number of extant occurrences

() – ()

Estimated number of extant individuals

() – () Genets

Factors that decrease conservation concern

Likes eutrophication

Very likely undercollected due to similarity with *L. minor*
